Professional Summary

Backend-focused Full-Stack Developer with 3+ years architecting scalable Node.js/Express APIs, MongoDB data layers, and microservices for SaaS, fintech, and compliance platforms. Recently expanded into agentic AI backend systems (LangChain, LangGraph, RAG, MCP) to build intelligent automation and LLM-powered workflows. Delivers secure, high-performance server-side architecture that has cut operational costs up to 70% and improved API response times by 40%.

Professional Experience

THEODIN INFOTECH PRIVATE LIMITED Feb 2024 – Present
Full-Stack Developer (Backend-Focused) *Jaipur, India*

- Architected scalable Node.js/Express REST & microservice backends with MongoDB, JWT/OAuth authentication, WebSocket real-time services, and Redis caching across 6+ concurrent enterprise SaaS platforms, cutting API response times by up to 40%.
- Built backend systems for 2 multi-module SaaS platforms serving 500+ business users – unifying product catalog, sales, production, and warehouse operations for one, and hiring, training, and scheduling workflows for another – integrating cloud storage, email services, video conferencing, AI assistants, barcode/QR scanning, and a demand-forecasting service, cutting manual data-entry time by 35%.
- Built the backend for a multi-branch client compliance management platform (GST, audit, income tax tracking) with automated recurring deadline generation, secure OTP-based client/staff portals, and department-wise transactional email delivery.
- Engineered blockchain backend integrations (Solidity smart contracts on Binance Smart Chain, 25% gas optimization) and, staying current with industry trends, built agentic AI automation workflows (LangChain.js, LangGraph, Google ADK, MCP, n8n) plus IoT/hardware integrations that reduced manual intervention by 60%.

ROCKETREACH Aug 2023 – Sep 2023
Frontend Developer Intern *Remote*

- Built 10+ advanced React.js components with complex state management, collaborating with backend APIs to reduce data-load latency by 20%.
- Worked closely with senior engineers to debug integration issues between frontend components and REST endpoints, improving data-fetching reliability.
- Participated in code reviews and sprint planning within an Agile development workflow.
- Optimized component rendering performance, reducing unnecessary re-renders across key UI modules.

ONGRAPH TECHNOLOGIES PVT. LTD. Jun 2022 – Aug 2022
Web Developer Intern *Jaipur, India*

- Developed admin dashboard and internal APIs in Agile sprint teams, cutting manual reporting time by 25%.
- Assisted in database schema design and query optimization for internal tools used by the operations team.
- Collaborated with senior developers to implement RESTful endpoints for internal data management tools.
- Contributed to bug fixes and feature enhancements across multiple client-facing web modules.

Technical Skills

Backend Engineering: Node.js, Express.js, RESTful & Microservices Architecture, WebSocket (Socket.io), JWT/OAuth, Redis Caching, Middleware Development
Database Management: MongoDB, Mongoose ODM, Data Modeling, Query Optimization, NoSQL Architecture
Agentic AI & LLM Engineering: LangChain.js, LangGraph, RAG, Google ADK, Model Context Protocol (MCP), n8n, Ollama, Claude API
Cloud & DevOps: AWS (S3, EC2), DigitalOcean, Hostinger VPS, Nginx, PM2, Docker, CI/CD Pipelines, Git/GitHub
Blockchain: Solidity, Ethers.js, Smart Contract Integration, Binance Smart Chain (BSC), Web3
Frontend (Supporting): React.js, React Native, Next.js, TypeScript, Tailwind CSS

Education

Poornima Group of Institutions Jul 2020 – May 2024
B.Tech in Artificial Intelligence and Data Science (CGPA: 8.4/10.0) *Jaipur, Rajasthan*
